

## THE NEW SOCIAL NETWORK: EXCLUSIVELY FOR DOGS AND THEIR BEST FRIENDS.

*Snoopstr* is the brand new tool for dog owners to download and connect their dogs through. Available on [www.snoopstr.com](http://www.snoopstr.com) or via the App Store ([www.snoopstr.com/app](http://www.snoopstr.com/app)), *snoopstr* is the social network dog owners have been waiting for.

*Snoopstr* lets you plan activities for your best friend with other dogs, locate dog-friendly places including parks, zones and play areas, as well as local vets, all of which you can check-in at and leave ratings for.

With *snoopstr* your pooch can also befriend other dogs whereby you can follow their feeds and comment on their photos and stories.

*Snoopstr* is the perfect tool for enhancing the dog-loving community.

The founder of *snoopstr*, Istvan Szilagyi, is himself an owner of two dogs who, after recognizing the need for such an app-based community, set about creating something his dogs would benefit from: "We wanted to create a community where dog owners can find useful content and bring everything together in one place. You can share all your great pictures, find useful information about the local area, while making new friends at the same time!"
